

WOODSTOCK FIELD  
DAY  
6 MAY 2020

Have you marked your  
diary yet for the  
Second Annual  
Woodstock Field Day?

Have you liked the  
Woodstock Field Day  
Facebook page?

If you have, you are  
one step ahead and  
will get all the up to  
date information as it  
happens.

If not, you might just  
be missing out on  
some great  
information!

31 JANUARY 2020

### DETAILED SALEYARD REPORT – CATTLE

Market information provided by MLA's National Livestock Reporting Service

#### CTLX Carcoar

CTLX Carcoar report date 28 January 2020

#### Yarding 3500

It was a good quality yarding with good numbers of young cattle to suit both the feeders and trade buyers. There was also a pretty good selection of well finished grown steers and heifers and once again there were large numbers of cows and their young calves. A full field of buyers were operating in a solid market.

Young cattle to the trade were 10c dearer with the prime steer yearlings selling from 298c to 310c while the prime heifer yearlings sold to 308c/kg. Feeder steers and heifers were 18c to 23c dearer with the feeder steers selling from 307c to 343c while the feeder heifers sold from 285c to 310c/kg.

Grown steers were 15c dearer with the prime medium and heavy weights selling from 275c to 308c/kg. Prime grown heifers were up to 15c dearer with the heavy weights selling from 266c to 299c/kg. A Forbes district restocker purchased a top quality pen of two four and six tooth Angus heifers paying 286c/kg. Cows were 10c to 14c dearer with the 2 scores selling from 181c to 230c/kg. The better 3 and 4 scores sold from 214c to 279c with the prime heavy weights averaging 261c/kg. Bulls sold to 300c/kg.

### DETAILED SALEYARD REPORT - SHEEP AND LAMB

Market information provided by MLA's National Livestock Reporting Service

CTLX Carcoar report date 29 January 2020

#### Yarding 14100 Lambs 7200 Sheep 6900

It was a good quality yarding with good numbers of young cattle to suit both the feeders and trade buyers. There was also a pretty good selection of well finished grown steers and heifers

and once again there were large numbers of cows and their young calves. A full field of buyers were operating in a solid market.

Young cattle to the trade were 10c dearer with the prime steer yearlings selling from 298c to 310c while the prime heifer yearlings sold to 308c/kg. Feeder steers and heifers were 18c to 23c dearer with the feeder steers selling from 307c to 343c while the feeder heifers sold from 285c to 310c/kg.

## **DETAILED SALEYARD REPORT - SHEEP AND LAMB**

Market information provided by MLA's National Livestock Reporting Service

**Cowra** report date 31 January 2020

**Yarding** 6250 **Lambs** 5450 **Sheep** 800

Lamb numbers increased and quality was very good for the well finished lambs while there were some plainer lines throughout. There were mainly trade and heavy weights penned along with plenty of store lambs suitable for the restockers. All the buyers were present and operating and competition was strong resulting in a dearer trend across most grades, especially for the fresh trade and extra heavy weight lambs.

Light lambs to the processors averaged \$148 while stores averaged from \$141 to \$161/head. Medium and heavy trade weight lambs were firm to \$6/head dearer and averaged from 800c to 825c/kg cwt. The heavy trade weight, 22 to 24kg range sold from \$182 to \$200/head.

Heavy weight lambs were \$12/head dearer and averaged from 770c to 785c cwt and sold from \$210 to \$236, while extra heavy weight lambs topped at \$267/head.

Mutton numbers eased and quality was varied throughout. Medium Merino ewes sold from \$123 to \$144/head or 510c to 600c/kg cwt. Heavy first cross were up \$7 and sold from \$174 to \$220/head or 600c/kg cwt.

## **UPCOMING SALES & EVENTS**

7 February – Special Weaner Store Sale CTLX

14 February – Store Cattle Sale CTLX

27 March – Blue Ribbon Weaner Sale CTLX

6 May 2020 – Woodstock Field Day

## **UPCOMING LLS EVENTS**

Bathurst - Thursday 6th Feb - Property Planning (LLS)

Molong - Friday 14th Feb - Pre-Season Info Session (LLS & NSW DPI)

Mandurama - Thursday 20th Feb - Acid Soils, a new look (LLS, NSW DPI & Grassland Society of NSW)  
 Canowindra - Thursday 27th Feb - Pre-Season Livestock & Cropping Info Session (LLS & NSW DPI)  
 Cowra - Wed 4th - Thursday 5th Mar - Young Guns MLA Business Edge Workshop (Holmes & Sackett)  
 Greenethorpe - Thursday 5th Mar - GRDC Northern Pulse Check Group Inoculation Workshop TBC  
 Parkes - Thursday 12th Mar - Insect ID workshop for grain growers & advisers (CESAR)  
 Cowra Tropical Grass plots walk - TBC, possibly mid-last week in Feb (NSW DPI & LLS)  
 Orange Tropical Grass plots walk - TBC, possibly last week in Feb (NSW DPI & LLS)

## NEW SOUTH WALES WORMS, FLIES AND LICE UPDATE - JANUARY 2020

### NSW LOCAL LAND SERVICES

#### Central West LLS

**Forbes: Nik Cronin, DV ([nik.cronin@lls.nsw.gov.au](mailto:nik.cronin@lls.nsw.gov.au)) and Belinda Edmonstone, DV ([belinda.edmonstone@lls.nsw.gov.au](mailto:belinda.edmonstone@lls.nsw.gov.au))**

Ongoing dry, hot weather has meant that the thought of worms is far from our minds. It is unlikely that sheep will need a second summer drench; however, the only way to accurately assess this is to do a [WormTest](#).

Weaner mobs need to be treated differently. Young sheep will not cope with a worm burden when they have an immature immune system. They are very susceptible to worms, particularly if nutritionally

stressed, and producers should consider drenching them with an effective [combination drench](#) at weaning. Monitoring worm burdens in this group is essential particularly if they are in [containment lots](#) and fed on the ground where exposure to infected faeces and hence worm larvae could be a consequence if there is any moisture from rain or leaky watering points.

### ***Riverina LLS***

**Young: Eliz Braddon, DV ([eliz.braddon@lls.nsw.gov.au](mailto:eliz.braddon@lls.nsw.gov.au)) and Evie Duggan, DV ([evie.duggan@lls.nsw.gov.au](mailto:evie.duggan@lls.nsw.gov.au))**

[Worm egg count](#) (WEC) reports for the Young area have shown an increase in counts, but due to current conditions and varying management, they continue to vary from flock to flock. As a general rule, ewes that were carrying a low worm burden and have been in confinement still do not require drenching. This is due to the [harsh environment](#) for worm larvae survival.

Producers who have been having issues with animal health (e.g. summer pneumonia) have seen higher worm egg counts in those sheep that are clinically affected compared to their healthy counterparts. This is an important reminder of the critical role that the immune response in adult sheep plays in keeping worm burdens low.

Producers are strongly encouraged to carry out their own WEC's so that they can make informed decisions regarding the need to drench or how long they should wait before [re-checking](#).

### Lamb slaughter

### Eastern States Trade Lamb Indicator (ESTLI)

# Central Tablelands Local Land Services

## Blayney pre-season information session

**When:** Thursday 13 February 10am

**Where:** Blayney Shire Community Centre

**Scott Wallace, NSW DPI – Seasonal Conditions**

**Phil Cranney, LLS – Renovate or Rejuvenate Pastures?**

**Charlotte Sutherland, Upper Murray Seeds - Pastures for Productivity and what varieties are in short supply**

**Graeme Tooth, Barenbrug - Pastures fit for Purpose**

**Kate Lebrocque, Auswest - Pastures for Persistence**

**Bruce Watt, LLS – Take stock of animal health**

**Will Berry, Blayney Vet Hospital – The key to 100% live calves**

**Jess Richards, NSW DPI – Individual sheep management ROI**

**Please book online for catering (lunch) purposes:**

<https://www.trybooking.com/BHZZP>

Central Tablelands LLS is offering attendees one free NIR feed &/or dam water test for their livestock enterprise.
